The operating system for premium valet.

22 years of operating record. 203 named accounts across 6 markets.
Two-round capital plan — $500K F&F now, $4.5M acquisition seed later.

ADVISOR WORKING FILE · Pre-final terms

SOPHI Mobility LLC
Joshua Casey · CEO · jcasey@sophimobility.com · sophimobility.com

01 · THE PROBLEM

Premium hospitality's front door is run by commodity operators.

Every hotel, restaurant, and hospital that cares about its guest experience treats valet as the arrival moment — but the industry that fills the podium runs on labor arbitrage, high turnover, no data, and no product story. The category has no operator-plus-OS winner.

70–80% staff turnover

Industry-standard operator model burns through frontline talent. Guests feel it. Property managers absorb it. Insurance premiums price it in.

1% no-wait retrieval

Category benchmark for how often a guest gets their car without waiting. That's the bar SOPHI's competitors clear — and premium hospitality accepts it.

Zero operating data layer

Shifts run on paper. Incidents lived in radio traffic. When a property manager asks for last night's numbers, they get a story, not a system.

02 · THE INSIGHT

Valet is a hospitality-ops problem sold as labor.

The operators who solve it don't scale labor better — they build a system where every shift produces data, every incident is logged, and every staff member gets better. SOPHI is what that system looks like when you run it inside the operator, not sell software to them.

> "Every number, traceable. Every shift, a data point. Every account, a formula. Every hire, a specialist track."

SOPHI is a services-plus-technology business — hospitality operations run through Hub (the software), the Orchestration Layer (the staffing model), and five revenue streams (the money layer). The moat isn't the software; it's what the software captures about how the people work.

→ SOPHI OS · Hub · Orchestration Layer · Academy · Revenue Model

03 · THE MARKET

$150M TAM. $57M SAM. 203 named accounts across 6 markets.

Not a top-down TAM estimate — a bottom-up build. Every account has a specific address, a real operator, a known credibility gate, and its own revenue formula. This is the pipeline the six-market plan runs on.

$150.3M
PORTFOLIO TAM
6 markets · 203 accounts

$57.3M
ADDRESSABLE SAM
38% of TAM · 93 accounts

$28.3M
Y5 PARKING SOM
19% TAM · 49% SAM

$75.5M

Charlotte, NC	24	12	50%	$20.17M	$7.75M	WARM · 4 anchors
Indianapolis	14	7	50%	$19.42M	$4.04M	COLD · V7 hometown
Phoenix, AZ	19	5	30%	$9.27M	$3.92M	COLD start
Louisville, KY	7	2	30%	$2.12M	$0.98M	COLD start
Cleveland, OH	8	2	30%	$0.72M	$0.34M	COLD start

04 · THE PRODUCT

SOPHI OS. Three layers of the same operating unit.

The operating layer, the people layer, and the money layer, running as one system. Every property is a config object. New verticals ship as configuration, not code.

OPERATING LAYER

SOPHI Hub

- Incidents & write-ups — photo, timestamp, GPS
- Shift daily reports auto-generated at 03:00
- Live per-property P&L, portfolio roll-ups
- Insurance-grade paper trail

PEOPLE LAYER

Orchestration + Academy

- Market Officer + Sr. AE, 2-seat layer
- 5 specialist tracks: LUX, MED, EVT, ambassador, disp
- <5% churn (industry avg 15–20%)
- 82% no-wait service (industry ≈ 1%)

MONEY LAYER

Revenue Model

- Valet Ops · $4.02M → $28.3M Y5
- OS Licensing · $1K+/site/mo target
- SMS Retrieval Ads · $8.6M Y5
- Referral Services + Franchise Royalties

05 · TRACTION

22 years in the flag. 41% revenue CAGR. Zero cold-start risk.

SOPHI didn't start at incorporation. It started in 2004 with Joshua Casey inside Elite Management, running the same operating model that defines the company today.

41.4% REVENUE CAGR Since 2015	<5% ANNUAL CHURN Industry 15–20%	82% NO-WAIT SERVICE Industry ≈ 1%
28→72% NET MARGIN LIFT JSK turnaround	3–5× REVIEW LIFT Post-installation	$1.38M 2026 REVENUE 62.3% seasonal earned

OPERATING RECORD · KEY MOMENTS

2004	Joshua Casey joins Elite Management
2015	SOPHI Global spun up in Indianapolis
2015–18	6 accounts across 3 verticals
2022	SOPHI Mobility founded, South Bend
2024	Capital Grille Charlotte (Darden anchor)
2025	STK Charlotte — 4th anchor
2026	$593,740 booked Jan–Aug in Charlotte
2027	G&G Denver ×2 + Houston committed

06 · BUSINESS MODEL

Every account priced from its own formula. 50% GM, 25% EBIT.

Not a subscription business. Not a labor arbitrage business. A services-plus-software business where each account carries five pricing variables, one operating record, and a place on the WAS score.

PRICING FORMULA · BY VERTICAL

VERTICAL	FORMULA	Y1 TYPICAL
Restaurant	Seats × turns × attach	$70–180K
Hotel	Rooms × ADR × attach	$140–420K
Hospital	Beds × visitor volume	$260–780K
Venue	Capacity × cadence	$110–340K
Residential	Units × amenity fee	$60–220K

FIVE REVENUE STREAMS

Valet Operations
Y5 $28.3M · 50% GM base engine

SMS Retrieval Ads
Y5 $8.6M · activates Y2 at 15K/mo

OS Licensing
$1K+/site/mo · target 3 paying by Y2

Referral Services
Sister-property multiplier revenue

Franchise Royalties
Post-Y3 optionality, priced separately

07 · FINANCIALS

$1.38M actual (2026) → $28.29M Acquisition SOM by 2031. 25% EBIT at Y5.

Two curves anchored to one 2026 base. Organic Growth Model — 5-year P&L at 51.4% CAGR. Acquisition Growth Model — SOPHI 6 SOM built account-by-account. SMS ad layer rides on top of the acquired portfolio.

ORGANIC GROWTH MODEL · 5-YR P&L · $ IN THOUSANDS

LINE	2026A	2027	2028	2029	2030	2031	Acq · 2031
Gross revenue	1,380	1,720	2,100	3,700	6,500	11,000	28,290
Direct labor & ops	(690)	(852)	(1,029)	(1,776)	(3,120)	(5,280)	(13,579)
Gross profit	690	868	1,071	1,924	3,380	5,720	14,711

EBIT	255	344	441	888	1,625	2,750	7,074
EBIT margin	18.5%	20.0%	21.0%	24.0%	25.0%	25.0%	25.0%
Net income	148	199	256	542	1,016	1,725	4,437

Full 5-yr P&L on Financial Performance page. Acquisition Growth Valuation on Valuation page. SMS ad layer excluded here — adds $2.25M–$8.62M by year.

08 · COMPETITION

Unbundled category. No operator-plus-OS winner.

Three player types — national labor operators, regional shops, and pure parking tech. None combines operating credibility with a software layer. SOPHI is where the two meet.

DIMENSION	SOPHI	TOWNE PARK	LAZ	SP+ / METRO	REGIONAL
Hospitality credibility	●●● Strong	●●○ Mixed	●○○ Mixed	○○○ Absent	●○○ Local
Operating data layer	●●● Strong	○○○ None	●○○ Parking	●●○ CV only	○○○ None
Guest experience	●●● Strong	●○○ Std	●○○ Std	○○○ Commodity	●○○ Variable
Staff retention	●●● <5%	●○○ 70%+	●○○ 70%+	●○○ 70%+	●○○ Variable
Unit economics	●●● 50/25%	●○○ Thin	●○○ Blend	●○○ Diluted	●○○ Variable

Full analysis on the Competition page. ●●● Strong · ●●○ Mixed · ●○○ Weak · ○○○ Absent.

09 · TEAM

22 years of operating memory. Zero cold-start risk.

The playbook doesn't need to be written — it needs to be replicated. Leadership carries the accounts, the culture, and the operating record that de-risks execution across the six-market portfolio.

JC **Joshua Casey**
CHIEF EXECUTIVE OFFICER

22-yr operator arc: Elite → SOPHI Global (2015) → Denison → SOPHI Mobility. 41% revenue CAGR since 2015.

TY **Taylor Yoder**
CHIEF OPERATING OFFICER

Multi-market operations lead. Charlotte anchor operator. Ownership over the operational playbook.

BT **Bryce Tolle**
CHIEF TECHNOLOGY OFFICER

Hub architect. Owns product roadmap and licensing motion. May 1 MVP deadline holder.

AM **Alex Mountzouros**
CHARLOTTE GENERAL MANAGER

First anchor market. 4 Darden-adjacent properties. Runs the operational proof site the deal is built on.

OZ **Owen Zultanski**
LEADERSHIP · CHARLOTTE CADENCE

Charlotte leadership cadence organizer. Coordinator across the operating meetings that keep the market on-book.

JF **Jaylin Ferguson**
LEADERSHIP · CHARLOTTE CADENCE

Charlotte leadership team member alongside Taylor, Bryce, and Owen. Property-level operating presence.

10 · CAPITAL STRATEGY

Two rounds. Founder majority preserved through both.

Round 1 F&F now, priced against the Organic Growth Valuation. Round 2 Acquisition Seed later, priced against the Acquisition Growth Valuation, funds two operator acquisitions in Indianapolis and Denver.

ROUND 1 · F&F REFINANCE · NOW

$500K at $4.50/share

PRE-MONEY	$4.50M (organic-anchored)
POST-MONEY	$5.00M
SHARE PRICE	$4.50
SHARES ISSUED	111,111 (10% at post)
INSTRUMENT	Priced round or SAFE @ $5M cap
HOLD	5 years (Jan 2027 → 2031)
BASE MOIC	6.31× at Acquisition Growth Valuation
BASE IRR	44.6%

ROUND 2 · ACQUISITION SEED · ~2028

$4.5M at $10.80/share

PRE-MONEY	$12.00M (Acquisition Growth Valuation-anchored, placeholder)
POST-MONEY	$16.50M
SHARE PRICE	$10.80
SHARES ISSUED	416,667 (13% at post)
INSTRUMENT	Priced preferred (TBD with advisor)
HOLD	~4 years (2028 → 2031)
BASE MOIC	2.63× at Acquisition base · 3.99× w/ acquisitions
BASE IRR	27.4% at Acquisition base · 41.3% w/ acquisitions

FOUNDER RETENTION PATH

Today 90% → After R1 81% → After R2 70.4% · +ESOP pool 7.8% = 78.3% founder-controlled at post-R2
